Model 51/53 Product Package Change

In response to feedback from our channel partners, Bourns® Resistive Products Division is announcing a shipping package improvement for our [Model 51/53](#).

This product was previously shipped in preformed trays and most recently in tubes. This product will now be shipped in perforated individual cell trays that are extremely popular with our channel partners. For your reference, a photo of the new tray is provided below.

This packaging change only affects single gang versions of the Model 51 and 53. This change is effective immediately for all current and new orders. For your reference, an updated Distribution Price List is included, showing the change to minimum order quantities and multiples to accommodate the new cell trays. Changes to minimum order quantities and multiples will be implemented with all new orders.

Please feel free to contact me with any questions regarding this change.

Best regards,
Emill Melliz
